

# LUCA

## MWD GLASS

- Beautiful in its simplicity
- Exceptionally manoeuvrable

Anna about Luca MWD: “My Luca MWD is first and foremost a Luca, which means a chic design, high-quality components, exceptionally high reliability and a modern look with a white or grey frame and colourful accents. Furthermore, the drive wheels on my Luca MWD are fitted under the middle of the frame. I sit right on top of them and that gives my Luca MWD an incredibly small turning circle. With my Luca MWD, I can literally perform a pirouette of about 77 centimetres. The practical anti-tip system ensures that the Luca remains safely upright. I use my Luca MWD indoors where its manoeuvrability is ideal, but the ingenious Glass seat system, suspension on the drive wheels and the spring-loaded seat back make it so comfortable that I can ride smoothly over any bump outdoors as well. I like to be seen riding around in this great-looking wheelchair.”

# LUCA MWD GLASS

## Ultra-compact

The Luca MWD has a compact frame with the drive wheels fitted directly under the user's seat, which means it can turn on a postage stamp. This kind of manoeuvrability is really practical. It makes this wheelchair ideal for riding around indoors and getting in and out of a lift.

## Chic design

The one-piece frame of the Luca MWD is fitted with top-quality components. The Luca MWD is very maintenance-friendly and has a chic design. The colourful accents can be replaced in a trice.

## Glass seat system

The Luca MWD is fitted with the highly-reputed Glass seat system. This reliable system can be completely adjusted to meet individual requirements to provide the user with optimal comfort over long periods of time.
